Art Unit: 1761

This application contains claims directed to the following patentably distinct species of the claimed invention:

Species I, drawn to a plug that has two diametrically opposing arms to retain the edible;

Species II, drawn to a plug that has a rod like element to retain the edible;

Species III, drawn to a plug that has a plurality of pegs to retain the edible;

Species IV, drawn to a plug that has a cylindrical element to hold or retain the edible;

Species V, drawn to a plug that has a ^{radially}~~radially~~ extending strip projections to retain the edible;

Species VI, drawn to a plug that is capable of receiving an edible support stick.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include

all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
